

ELECTRO DE-IONISATION

Combination of membrane based technology and resin based technology to produce DM water / Ultra pure water.

Key Features:

- No regeneration, chemical free operation
- Extremely compact system
- No Effluent generation
- No Bulk acid, Bulk caustic tanks required
- No downtime, continuous process
- Skid mounted system
- Low operating cost
- Easily Expandable

Application:

- Process water
- Boiler Feed
- Ultra-pure water
- F&B
- Electronics
